E. Long Answer Type Questions

1. How are animals helpful to us?

Ans. Animals are helpful to us:

- a. We eat meat of many animals like goat and chicken.
- b. Animals like dogs, cats and parrots are kept as pets in homes.
- c. farm animals like cows and buffaloes give us milk. Camel milk is also used in some parts of the country.

2. How do animals eat?

Ans. Different animals eat different kinds of foods. The part of an animal's mouth is suited to the kind of food it eats. Animals eat in many different ways. This is because they eat different kinds of food. Such as:

- * Cats eat meat. They have pointed teeth to tear the meat.
- * Cows have sharp front teeth to bite off leaves. They have flat back teeth to chew the grass.
- * Parrots have hooked beaks so that they can bite into fruits. They have no teeth.
